Department of Botany

‘ Certificate Course in Mushroom Production ’

Syllabus of Mushroom cultivation

UNIT I -INTRODUCTION (5 periods)

Introduction, Meaning of Mushrooms, Concept and need, Advantages, disadvantages, food value, and Medicinal Value of mushroom

UNIT-II: MUSHROOM CULTIVATION (15 periods)

Introduction, Systematic position, thallus structure and fruiting body of mushroom (*Agaricus bisporus* and *Pleurotus*). Merits of mushroom cultivation, Commercial cultivation of mushroom (*Agaricus bisporus* and *Pleurotus*).

(Substrate, Soaking, Pasteurization, Spawning, Cropping, Picking and Packing, Flow chart), Mushroom product.

UNIT-III: PRACTICALS ON MUSHROOM DEMONSTRATION

~~UNIT-IV~~ Principle, Requirement, procedure, observations, Harvesting, results and records,

(Students are expected to prepare a model of Mushroom cultivation laboratory,

Course Outcomes: -

After completion of certificate course student will be able to understand following outcomes

- * To understand economic important of the Mushroom (Fungi)
- * Students will be able to know about different kinds of Mushroom
- * Students will be able to understand the small scale production of the Mushroom in laboratory
- * Students will be able to know about the commercial production of Mushroom.

SYLLABUS

Certificate Course CCPI-21-22

Introduction of Electronic Devices & components in Modern Physics.

Objectives :

This course introduces students electronics components and devices and is on understanding the structure and function of devices, and the various aspect and characteristic of devices and components.

Learning Outcomes :

Upon successful completion of this course, the student will be able to:

- Identify the basic foundations of that devices and components in electronics in modern Physics.
- Demonstrate them and ability to apply in various electronic circuits, models and techniques to easy operate.
- Day today life use components easy to operate and getting knowledge in our mother tong.

Course outline

Sr.No	Unit	Marks
1	Unit One : Introduction of Electronics: classification of elements ,metal, nonmetal, semiconductor,definition electronics, importance of electronics, physics in electronics, atom, atomic structure, free electron outermost orbit free electron elements, semiconductor elements Germanium , silicon	10
2	Unit Two : Semiconductor: Definition of semiconductor, types of semiconductor, Intrinsic and Extrinsic semiconductor type P and N type Semiconductor PN junction diode and its characteristics forward and reverse biased concept of vacuum tubes, advantages of semiconductor over vacuum tubes,	15
3	Unit Three Semiconductor Devices : Diode types, Rectifier full wave half wave bridge ,uses of diode, Transister,and its types,NPN and PNP its Biasing & characteristics, Uses other semiconductor devices FET,and types uses , BJT, uses application of semiconductor. transformer,.	15
4	Unit Four : Electronics Basics Instruments : Soldering gun and its use, CRO, its function and uses applications Function generator, uses and application , Analog and digital multimeter use and application color code of resistance , Capacitors its types uses and applications IC introduction basics IC 555 and IC741	10
