Every year department of Botany has been taking different types of activities. Subject of Botany depends on field study. Majority flowering and non flowering plants available on local area hence we had organized local area field study tours for observation and study of plants on spot. The students directly observe and study a number of plants on field. Such as collect diseased plants parts, and acquire plants for lab study. Some uncivilized flower plants also collect for preparing herbarium.

For this purpose we have organized a field study tours on local areas

For this purpose we have visit new local areas.

1) Date 25-08-2016 College surrounding areas. 2) Date 05-10-2016 Indewadi.

Study tour have been organized by college at Raigad district on 2 to 4 January 2017

Student of Botany subject have been actively participate such as other department activity also taking through Botany department. These are as follow

1) Make a departmental wall paper name "BOTANICA" on the basis of plants. Make a woolen model chart of Mitosis and meiosis and sketch figure of botanical view.

2) Collect the economically important and Medicinal plants, plants parts and seeds and make a chart on card sheet paper and file. Each plant describes botanical names, common name, family, variety, and Economic usages.

3) To collect scientific articles from News papers and make a file, whenever students have empty time they can read these collected articles and gain more knowledge about science.

These departmental activities had been taking in academic year 2016-17. Please accept report.
